SWAGRIP Anti Slip Paper
& Anti Slip Fabric

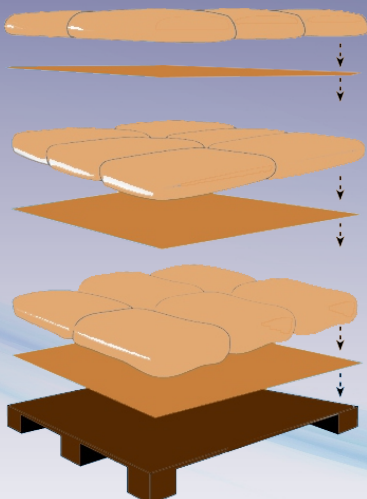

SWASAN now takes pleasure in introducing for the very first time in INDIA, an innovative stabilizing solution to prevent sliding of goods during storage, transportation, shipping, and handling, under the name **SWAGRIP**.

SWAGRIP anti-slip sheets are indispensable palletizing accessories that stabilize your products to secure and optimize their packaging.

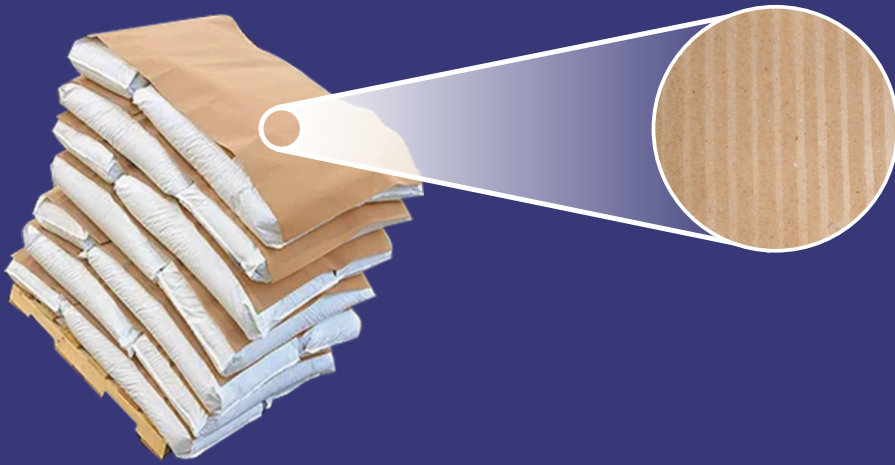

SWAGRIP has been developed particularly for the storage & transportation of goods that are prone to slipping & sliding. The anti-slip coating on the paper/fabric creates a friction-enhancing surface that helps to prevent items from shifting around, even when they are stacked in warehouses or while being transported in trucks.

SWAGRIP is effective regardless of the weight, type of load or the nature of packaging.

SWAGRIP can be used like a traditional tier separator. We recommend placing a non-slip sheet on the pallet first and then between each level, also the non-slip sheets can be placed manually or by automation.

The high coefficient of friction in **SWAGRIP** is due to a specialized design of a **HILL & VALLEY** coating on paper/fabric which acts to create vacuum and not allow packages to move – all the way from producer to consumer.

Unlike many Alumina & Silica Non-skid treatments, our anti-slip treatment is durable & remains effective for extended periods.

BENEFITS:

Provides a safe and secure surface for items to be placed on.

Reduces the risk of injuries & accidents.

SWAGRIP-P is 100% Recyclable & SWAGRIP-F offers high reusability.

Ideal for heavy-duty applications due to high burst and tear strength.

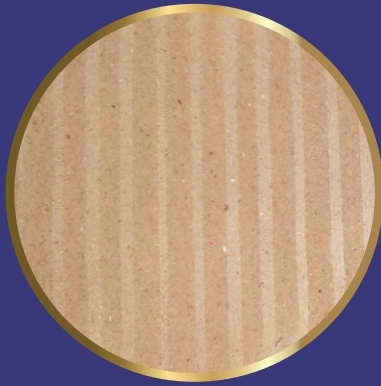

Reduces the usage of shrink film for wrapping providing economical savings.

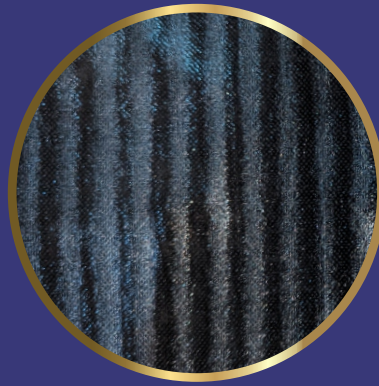

Specifications:

1. Available in Roll form (Width: 1m & Length: 50 / 100 / 200 m).
2. Customized sheet size available on request.
3. Co-efficient of friction up to 50 degrees.

**Say Goodbye to collapsed pallets, financial losses & hours of frustration.
Unstable & uncertain transportation is ancient history.**
